Asset Management

A Complete Fixed Assets Solution for Sage 300

Asset Accounting

Asset Maintenance

## Asset Tracking

Asset Leasing

Norming Asset Management offers a comprehensive fixed asset solution which caters to all the needs and requirements of asset management process, including Asset accounting, maintenance, leasing and handheld scanner-based tracking facility. The powerful reporting also delivers the insight into asset's status and performance in real-time.

Asset Accounting

By providing the intuitive and user friendly interface, Asset Accounting enables users to maintain and control asset lifecycle for both depreciating and non-depreciating assets with ease, covering purchasing, depreciation, adjustment, impairment, revaluation and disposal.

- ✓ Supports up to 5 books for various purposes including corporate financials, federal tax, state tax, etc.
- ✓ Compliance with IFRS and US GAAP.
- ✓ Flexible depreciation calculations support standard methods such as SL/DB/MACRS, user defined depreciation methods and more.
- ✓ Integrates with Sage core modules AP/AR/IC/GL/PO/PJC.

Asset Maintenance

Enables maintenance work to be planned, recorded and cost controlled.

- ✓ Be able to capture vendor information, SLA, etc.
- ✓ Meter can be set up to track the equipment usage and production.
- ✓ Provides the capability to ensure the actual costs aligned with the budgeted costs.
- ✓ Scheduled maintenance activity.

Asset Tracking

Keeps your asset physical status up to date with easy to use software and handheld scanning solution.

- ✔ Barcode, QR code and RFID handheld devices supported.
- ✔ Reconciles your fixed assets status against your current asset register, for example, damaged, missing or more user-defined status.
- ✔ Provides Audit Report on all the information required for keeping track of your fixed assets, including which have been transferred, inventory exceptions.

Asset Leasing

Provides the flexibility, along with the integrated functionality to handle complicated asset's leasing process with ease.

- ✔ Pre-defined leasing rules eliminate the manual principal and interest calculations.
- ✔ Automates the leasing process with flexible Billing schedule.
- ✔ Integrated with AP/AR for billing and payment purposes.
